Coffee grown worldwide can trace its heritage back centuries to the ancient coffee forests on the Ethiopian plateau. There, legend says the goat herder Kaldi first discovered the potential of these beloved beans.

The story goes that Kaldi discovered coffee after he noticed that after eating the berries from a certain tree, his goats became so energetic that they did not want to sleep at night. Kaldi reported his findings to the abbot of the local monastery, who made a drink with the berries and found that it kept him alert through the long hours of evening prayer. The abbot shared his discovery with the other monks at the monastery, and knowledge of the energizing berries began to spread.

Smoothies aren't an American invention. They go back centuries to cultures around the world, and then to South America as a "fruit slush". But it's safe to say that the American smoothies, a pureed fruit drink, began in the early 1920's when Julius Freed, another young man with a sensitive stomach, began looking for a way to enjoy fresh squeezed orange juice. His stomach couldn't handle the acidity of fresh squeezed oranges, so he found a way and a few choice ingredients to make them less acidic and a little frothy. His friends loved them and said, "Give me an orange, Julius," and thus his store, the "Orange Julius" was born.

Seizing on the idea and the concept of pureed fruit juices from Brazil and other countries, different people created different recipes. The invention of the blender and the refrigerator simply made the drink more popular and more accessible to more people.

The earliest known alcoholic beverage is a 9,000-year-old Chinese concoction made from rice, honey and fruit, but the first barley beer was most likely born in the Middle East, hard evidence of beer production dates back about 5,000 years to the Sumerians of ancient Mesopotamia. Archeologists have unearthed ceramic vessels from 3400 B.C. still sticky with beer residue, and 1800 B.C.'s "Hymn to Ninkasi"—an ode to the Sumerian goddess of beer—describes a recipe for a beloved ancient brew made by female priestesses. These nutrient-rich suds were a cornerstone of the Sumerian diet, and were likely a safer alternative to drinking water from nearby rivers and canals, which were often contaminated by animal waste.

The earliest remnants of wine were discovered in Iran, dating back to the Neolithic period (8500-4000 B.C.). The oldest evidence of cultivated vines were found in Georgia, dating from 7000-5000 B.C. It is supposed that the drink originally fermented by mistake. Native yeasts accidentally came in contact with grapes stored in containers, turning the sugars in the grapes into alcohol. The art of winemaking was later refined by the Egyptians and spread throughout the Mediterranean by the Greeks. The Romans made it popular all over Europe and the Spanish as well as other Europeans took their brew to the New World, Oceania and South Africa.

Terroir is a French term that simply means "a sense of place." When someone says a wine exhibits terroir, all they mean is that the wine they are drinking tastes the way a wine grown and made in the region where it was grown and made should taste. So if a California wine from the Napa Valley tastes the way a California wine made in the Napa Valley should taste, the wine has great terroir.
